PROTECTING OUR CHILDREN

DID YOU KNOW? Teaching children about boundaries and safe touches is healthy -- Teaching children about boundaries and safe touches is not sex education. There are many safety issues we teach children: bike safety, water safety, fire prevention, driver's training, etc. Personal safety programs should have age appropriate lessons that give children the skills they need to protect themselves without frightening them. Keeping children unaware of the dangers around them does not keep them safe. Predators count on children not knowing what to do. For more inFormation, please visit:
